Summary

Aspiring Data Scientist with strong skills in Python, SQL, and machine learning, experienced in building predictive models and analyzing large datasets. Proficient in EDA, feature engineering, and data visualization, with hands-on experience in deploying ML models and interactive dashboards using Flask and Streamlit.

Skills

Programming & Querying: Python, SQL

Data Science & Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Dashboard Development, Feature Engineering, Machine Learning, Model Evaluation.

Tools & Technologies: Power BI, Advanced MS Excel, Git, GitHub, Jupyter Notebook, VS Code.

Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Attention to Detail, Adaptability

Projects

Gen Z Mental Wellness Analysis and Interactive Dashboard | *Python, Machine Learning, Data Visualization*

- Analyzed 10K+ records to identify key factors influencing burnout risk using EDA, statistical analysis, and correlation techniques.
- Implemented K-means clustering and PCA to segment users into behavioral groups and identify high-risk profiles.
- Developed a Streamlit-based interactive dashboard for real-time visualization of trends, clusters, and mental health risk factors.
- **Tools Used:** Python, Pandas, NumPy, Scikit-learn, Streamlit, Plotly, Matplotlib, Seaborn

Disease Prediction and Risk Assessment System | *Python, Machine Learning*

- Developed machine learning models to predict diseases and assess risk levels based on user-reported symptoms, achieving 98.39% and 95.09% accuracy.
- Built a full-stack application using Flask API and React frontend for real-time predictions and user interaction.
- **Tools Used:** Python, Scikit-learn, Random Forest, Flask, React, Pandas, NumPy, Matplotlib, Seaborn, Pickle (.pkl)

Soil Moisture Prediction using Machine Learning | *Python, Machine Learning*

- Developed an end-to-end regression model to predict soil moisture levels for optimized irrigation management and drought mitigation.
- Performed feature engineering and model evaluation using Linear Regression, Decision Tree, Random Forest, and XGBoost.
- **Tools Used:** Python, Scikit-learn, XGBoost, Flask, Pandas, NumPy, Matplotlib, Seaborn, Pickle (.pkl)

Uber Rides Data Analysis and Visualization | *Python, Data Analysis*

- Analyzed 150K+ ride booking records to identify customer behavior patterns, operational trends, and business insights.
- Performed exploratory data analysis (EDA) and built visualizations to support data-driven decision-making.
- **Tools Used:** Python, Pandas, NumPy, Matplotlib, Seaborn

Certifications

- Google Data Analytics Certificate – Coursera (2026): Completed 8 case studies involving SQL, data cleaning, data visualization, and dashboard creation.
- Python for Data Science – AchieversIT: Completed a 6-month program covering data analysis, visualization, and machine learning concepts.

Education

Masters in Data Science

Chandigarh University, Punjab

July 2025 – June 2027

B.Tech Computer Science Engineering (AI & ML)

Vaagdevi Engineering College, Warangal

June 2020 – Aug 2024
